Faronics DEEPFREEZE ENTERPRISE

ABSOLUTE WORKSTATION INTEGRITY

CREATE SECURITY, MAINTAIN CONSISTENCY

Deep Freeze instantly protects and preserves baseline computer configurations. Regardless of the changes a user makes to a workstation, simply restart to eradicate all changes and reset the computer to its original state - right down to the last byte. Expensive computer assets are protected and technical support time is reduced or completely eliminated. Computing environments are consistently trouble-free, with 100% workstation availability.

CENTRAL MANAGEMENT

Deep Freeze Enterprise offers centralised deployment and enhanced flexibility options. Large computing environments can be easily controlled and configured using the Enterprise Console:

- Control workstations over a LAN or WAN
- Schedule system maintenance on demand
- Power-on workstations using Wake-on-LAN
- Manage workstations in groups imported from Active Directory
- Update and deploy customised settings on the fly
- Set a custom port number for use with the Enterprise Console
- Send customised messages from the Console to workstations

Deep Freeze has been providing trusted workstation protection since 1999. With over 10 million installations worldwide, Deep Freeze saves countless hours of technical support. 24 hours a day, 7 days a week.

Enterprise Console

The Enterprise Console allows administrators to remotely install, manage, and monitor Deep Freeze across their entire network via LAN, WAN, or the Internet.

Interoperability & LANDesk Plug-in

Deep Freeze workstations can be managed through any desktop management solution capable of executing remote commands. Our LANDesk plug-in lets you control Deep Freeze deployments natively through your LANDesk console.

Scheduled Maintenance for Software Updates

Administrators can create Scheduled Maintenance periods to execute custom batch files or automatically install Windows Critical Updates via the Internet or an SUS/WSUS server. Batch files can be used to perform virtually any task, including antivirus definition updates.

Intelligent Utilities for ABSOLUTE Control

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics' market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our user-driven, powerful technology innovations benefit educational institutions, libraries, government organisations, and corporations.

-> Retain User Data

Users are able to permanently store data in a network location, on removable media, on a Thawed partition, or on a ThawSpace (a virtual partition created by Deep Freeze). Administrators can specify the size and file system of the ThawSpace (up to 1000GB using NTFS).

Flexible Password Management

Deep Freeze Enterprise takes password management to an entirely new level with support for up to 15 passwords with variable expiration dates and times. One-time use passwords can also be generated on the fly to allow flexible access to workstation configurations.

Scheduled Tasks

The Scheduled Task Wizard allows administrators to dynamically schedule Deep Freeze related tasks for specific dates and times, and on a one-time or recurring basis.
