Deep Freeze Standard Feature History

Version 7.0

New Features

- Enhanced security.

Version 6.61

- Officially supported on Windows 7.

Version 6.5

- Licensing:
Deep Freeze now employs the same licensing scheme as other Faronics products. Therefore, a valid License Key must be entered into the product in order to prevent it from expiring after a 30-day evaluation period.
- Simplified Chinese localization added.
- Rewritten and expanded user guide.
- Windows 95/98/Me support dropped.

Version 6.4

- Rewritten password security functionality to resolve a reported potential security vulnerability in which a malicious user may be able to bypass the Deep Freeze password dialog when running as a Windows administrator user.

Version 6.3

- The *Boot Control* window provides the ability to *Reboot Now*
- System tray icon no longer flashes when machine is Thawed

Version 6.2

- Windows Vista support

Version 6.1

- Windows XP 64 bit support
- Localization to English, French, German, Spanish, and Japanese languages
- Installable on Vista for experimentation and testing. However, installation on Vista is not supported by Faronics. For the latest compatibility information, go to our Deep Freeze Vista information page at: <http://www.faronics.com/dfvista>

Version 6.0

- Updated graphics and user interface
- Improved program performance

Version 5.70

- Enhanced password security
- Improved program performance

Version 5.60

- Japanese localization

Version 5.50

- The Clone option was added to the Deep Freeze logon window to prepare workstations for the imaging process.
- Enhanced password security.
- Enhanced user interface.

Version 5.40

- Improved detection of dynamic disks on Windows 2000/XP. Freezing of software-implemented mirrors is now allowed and Freezing of software-implemented stripes or RAIDS is disallowed.
